

9-12-11

Dear Parents/Guardians,

Students are continuing to learn addition facts to 10. We are working on writing two addition facts for a given number bond.

For example:

Also, students are expected to write all numerals (0-10) correctly. That means students not only must form the numerals correctly but must also not reverse or write them backwards.

For example: 01 for a 10

Please note that beginning tomorrow 9-13-11 your child will be held 100% accountable for writing the numerals (0-10) correctly. Any number that is reversed or written backwards will be counted wrong. To reinforce this concept at home, if you notice your child writing numerals incorrectly please have him/her find it and fix it.

Thank you,

First Grade Teachers
