

$$4,100 + 900 =$$

We know:

$$\begin{array}{r} 47 \\ + 9 \\ \hline 40 \\ + 16 \\ \hline 56 \end{array}$$

or

$$\begin{array}{r} 47 \\ + 9 \\ \hline 56 \end{array}$$

Then we carry the zeros to our answer.

$$4,700 + 900 = 5,600$$

$$59,000 - 8,000 =$$

We know:

$$\begin{array}{r} 59 \\ - 8 \\ \hline 50 \\ + 1 \\ \hline 51 \end{array}$$

$$\begin{array}{r} 59 \\ - 8 \\ \hline 51 \end{array}$$

Then we carry the zeros to our answer

$$59,000 - 8,000 = 51,000$$

Multiplication

Division

$$2,000 \times 8 =$$

We know:

$$2 \times 8 = 16$$

Then we carry the zeros to our answer

$$2,000 \times 8 = 16,000$$

$$35,000 \div 5 =$$

We know:

$$35 \div 5 = 7$$

Then we carry the zeros to our answer

$$35,000 \div 5 = 7,000$$
